

PAL Portable Aquatic Lift™

The PAL Portable Lift™ requires no installation and roll: to any poolside location. The PAL is powered by a 24-volt rechargeable battery. Its replacement battery provides a full day's use and is quickly recharged using the accompanying charging unit.

The PAL is easy to use. Its operations are performed at the push of a button. The controls are waterproof, so they can be immersed for operator convenience.

The PAL is virtually trouble free. Its 300 lb. lifting capacity will accommodate almost any user.

The PAL is an easy solution in meeting ADA goals to provide universal access for public swimming facilities.

(Includes foot rest and seat belt)

Shipping Weight: 1,000 lbs

PAL Lift Accessories

The Spine Board Attachment works with any standard spine board (not included). Simply remove the chair assembly by pulling the attachment pin and replace that assembly with the spineboard attachment.

Gallatin Swim Lift

The Gallatin is the most versatile ADA compliant Swim-Lift® of the assisted access devices. This fully self-operated device is the first of its kind to accommodate both in-ground pools and spas without unnecessary customization. The Gallatin requires no more than 12-inches of total depth (deck to floor/bench) for proper installation and the standard unit will accommodate anchor locations of 20 1/2 to 30-inches from the pool wall thanks to its adjustable base stand.

The Gallatin is not only the most versatile lift in the aquatic industry; it's also the most proven. Supported by certified load and seismic calculations, the Gallatin is designed to lift a 400-pound load with only 55 psi of water pressure.

Anchor assembly and accessories sold separately. Field measurements required.
