

## Portable Vacuum System

This portable filter vacuum cleaner is an exclusive product by Acapulco. It will save pool water and chemicals by filtering out the existing dirty water and returning clear water to the pool. It can also be used as a temporary filtration system in the event of a mechanical breakdown.

## Automatic Vacuum System

### Ultra MAX Automatic Swimming Pool Cleaners

Ultra MAX is the most technologically advanced, easy-to-use, commercial pool cleaner available. It is lightweight and requires no hoist to place in pool.

You may then use the Wireless Remote Control to spot clean your pool, or let its on-board microprocessor guide. Cleans up to 12,500 square feet per hour and filters up to 10,000 Gallons per hour. Comes complete with remote control, 120' of floating cable and an extra set of brushes, belts, and filter bags. **(Bottom Cleaner Only)**

### Tiger Shark 2

Built tough to include the best warranty in its class. 24 DC motor is safer, uses less energy and provides most efficient vacuum strength in its class. Brushes and scrubs while it vacuums. On-board computer reads pool contours and directs the most effective cleaning program across the bottom and walls, right up to the waterline. First patented, easy-to-clean removable cartridge to be incorporated in a computer-controlled robotic pool cleaner. Unmatched quality and safety standards are applied at the factory.

### KING SHARK 2

The KINGSHARK2 tackles the most demanding commercial pools and makes even the toughest jobs easier. It's fast and convenient and now is available with the all new AV Twister cord swivel\* attachment to avoid cord tangling. The KINGSHARK2 is fully automatic and completely self contained. No hoses or filter hook-ups required. It completely cleans an Olympic size pool in under five hours! Removable filters rinse clean in minutes. Built to clean, designed to last.

### KING SHARK 2 PLUS

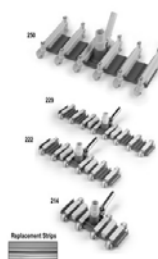

The KINGSHARK2 PLUS is built with all of the KINGSHARK2 PLUS's quality features...plus the added benefit of a wireless remote control unit and control box with timer.. The KINGSHARK2 PLUS is fully automatic and will completely clean an Olympic size pool in under five hours. It's equipped with a new AV Twister cord swivel to avoid cord tangling and comes with a caddy cart for easy transporting and storage. The KINGSHARK2 PLUS is also equipped with Auto Turn™, a feature that ensures the unit turns at preset intervals making sure your KINGSHARK2 PLUS is always moving and cleaning at maximum efficiency even when it's unattended!

## Vacuums

### POOL BUSTER MAX

Pool Buster is the world's first **battery-operated** handheld pool cleaner for your **entire pool or spa**. Pool Buster connects to any telescopic pole\* for deep cleaning. This powerful device quickly cleans and removes debris such as hair, sand, pebbles and leaves from all areas in the pool or spa.

The ProVac® cleans a pool bottom in half the time, even with low flow suction. Its unique suction chamber concentrates vacuum velocity equally from both ends as well as front to back. Full width flex strips guide debris into the suction chamber where it is quickly removed. Reinforced at all stress points, the body is molded in one piece of flexible polyethylene.

## Poles & Handles

### Super-Tough Fiberglass Handle

Super-Tough Handles are available in the standard length or in 12' and 16' lengths. Each handle measures 1-1/4" outer diameter to allow equipment that snaps over a pole to fit firmly. However, for use with brushes, vacuum heads or skimmers that snap into a pole, you will need the Quick-Change Adapter, R32033, listed below.

### Fiberglass Telescoping Handles

Fabricated from the highest quality fiberglass, these telescoping handles withstand heavy usage and abuse. Each handle is coated with a UV protective layer that prevents splintering and features a vinyl handle grip and E-Z lock compression cam for positive handle locking.

## Pole Accessories

All accessories are made of sturdy ABS or Aluminum and are bubble packed in pairs with screws. They mount easily on walls or fences.

### Accessory Hangers

Multi-purpose wall hangers that will hold vac hose, pole, test kit, skimmer and brushes.

### Aluminum Telescopic Handles

Fabricated from high quality drawn aluminum tubing. The 1-1/8 in. OD inside tube is clear anodized while the 1 1/4 in. OD outer tube is bright blue anodized.

### Adapt-A-Pole Kit

This kit is perfect for situations that require a long, straight pole and where shipping is required. It assembles on location and comes with two 8' handles. Includes two pre-drilled fiberglass sections and a pole adapter sleeve with bolts and lock nuts.

## Test Kits

### Pool MGR. Series

The precise Octa-Slide comparator system is used to comply with regulatory standards. The POOL MGR. series includes diagrammed instructions, saturation index calculator, water quality handbook, and the reliable Octa-Slide comparator system – all in a tough, blow-molded carrying case.

### Taylor Test Kit

Designed for the kind of comprehensive, routine testing performed by service technicians, commercial and public pool operators, and environmental health specialists. The 2000 Series™ allows users to build up their test kits in a stepwise fashion as their testing needs grow, without having to purchase a brand new case or color comparator unnecessarily.

## Stainless Steel Cleaning Kit

Qty.	Part #	Description
2	TOWEL	Terry Towel
1	WAX	Turtle Wax
1	SPONGE	Sponge
1	9371505	Stainless Steel Cleaner
1.5lb	25501B03X	Diatomaceous Earth

## Caulking

- Designed for all types of joints where maximum depth of sealant will not exceed ½ in.
- Excellent for small joints and fillets. Windows, door frames, reqlets. flashing, and many construction adhesive applications.
- Suitable for vertical and horizontal joints; readily placeable at 40°F.
- Has many applications as an elastic adhesive between materials with dissimilar coefficients of expansion.
- Submerged conditions, such as canal and reservoir joints.

### Fast Cure Marine Adhesive and Sealant - Sikaflex 291

## Deck-o-Seal

DECK-O-SEAL ONE STEP is a single-component, non-sag, elastomeric, polysulfide-based sealing compound used for caulking joints in structures that are subject to movement caused by temperature changes. ONE STEP resists the effects of oil and gasoline when spills are wiped up immediately.
